ABSTRACT

One hundred and thirty-three entries are listed in this general bibliography on transportation, the environment, and land use for transportation. The listings provide the most current information on these topics, dating from 1973 through 1975. The bulk of the documents are commercially published books, reports, and studies. Citations are alphabetized by author and include the title, date, number of pages, and availability. An author and title index and a list of selected publishers' addresses conclude the document.
